

GET TO KNOW THE VISION BEHIND THE TECHNOLOGY

VITAL⁴[®]

OUR TEAM & OUR MISSION

Vital4 was founded in March of 2016 with one simple, yet profound aim: “To tirelessly perfect due diligence using compliance-focused technology.” We are proud to be the only company in the world that approaches due diligence and background screening with a cloud-based application that supports global compliance legislation and their required controls.

Vital4 was built with four fundamental concepts in mind: Compliance, Accuracy, Global Insight and Value. Our team of 32 employees has over 75+ years experience in background screening and FCRA compliance, and we have processed over 15+ million transactions through our VITAL4SEARCH platform since June 2017.

Next-Gen Technology

Our cloud-based platform automatically collects, uploads and curates data nearly instantly. This increases organizational efficiency, reduces technology maintenance, and eliminates the need to constantly refresh data.

Reduce False Positives

Vital4 has automated the traditional manual processes, offering real-time, custom data. Say goodbye to manual databases with outdated results and increased risk of false positives.

Alleviate Human Error

Human data entry can only be done so fast and presents a higher level of risk for mistakes. Automated data extraction removes multiple instances of risk due to human error in the gathering, copying and entry of data.

DELIVERING HIGH-QUALITY SCREENING SOLUTIONS

Organizations across the globe use the Vital4 platform as a solution for risk assessment, mandated due diligence and AML/KYC controls that mitigate risk across their enterprise.

Contact Vital4 today to learn how our global screening solutions can help organizations like yours maintain regulatory compliance and mitigate third-party risk.
